

# School-Age Goals

**Bright  
Path**  
The best start in life

Our mission is to provide the children in our care with the highest quality developmental and educational programs in a nurturing, safe and supportive environment and to facilitate and enrich the childcare experience of our families.

## **Let's Learn!**

---

Children often need to satisfy curiosity, whether it's about their environment or the foods they eat. We provide lots of instructional activities for them to explore and learn. Activities include:

- Cooking projects in which children measure and mix up both classic and brand new recipes
- Build your own pizza, including making dough from scratch (a fan favorite!)
- Science projects, such as building a personal catapult, creating stalactites, and designing the classic potato battery

## **Let's Play!**

---

Many of our children participate in athletics outside of our center. We provide a noncompetitive atmosphere with no requirements or expectations—just try your best, try new experiences, and have fun. Instructional games include outdoor sports like baseball, basketball, dodgeball, obstacle courses, and much, much, more. Indoor activities (and rousing crowd pleasers!) include scooter basketball and floor hockey.

## **Let's Discover!**

---

Children need freedom of choice to discover who they are and what they like to do. We provide a variety of learning centers on our spacious first floor, including a dramatic play area and foosball and ping pong tables. We also have tables where children can create art projects, play board games, or design with beads. We even have couches for quiet reading or conversation. Computers are located in our homework/library room and are available for children on a daily basis.
